

Inverse f-distribution

The inverse f-distribution is a continuous probability distribution which is the inverse of the variable distributed according to the f-distribution.

```
a:=curve2d(finv(y , 1 , 1) , y , 0 , 0.97 , 20)
b:=curve2d(finv(y , 2 , 1) , y , 0 , 0.97 , 20)
c:=curve2d(finv(y , 5 , 2) , y , 0 , 0.97 , 20)
d:=curve2d(finv(y , 10 , 1) , y , 0 , 0.97 , 20)
```

Name	Title	Color	Origin
a	(1,1)	red	
b	(2, 1)	blue	
c	(5, 2)	green	
d	(10, 1)	yellow
